

SUMMARY

Software Engineer with 1+ years of professional software development experience and hands-on expertise building web development projects. Proficient in **Java, TypeScript, JavaScript, and Python**, with a strong foundation in **Data Structures, Algorithms**. Adept at taking loosely defined problems and turning them into clean, scalable, and high-quality software in fast-paced, collaborative environments.

EXPERIENCE

- Accenture**

Feb 2025 – Present

Software Engineer

Gurugram, India

- **Developed and optimized RESTful APIs** using **Node.js** and **Next.js**, enhancing backend efficiency and request handling under high-concurrency workloads.
 - **Designed modular, reusable React UI components** using **software design principles**, reducing code duplication and improving long-term maintainability.
 - **Collaborated across cross-functional teams** to deliver core project features, ensuring timely execution and positive impacts on team deliverables.
- Matrix Tech Pvt. Ltd.**

Aug 2023 – Sept 2023

Frontend Development Intern

Jaipur, India

- Developed and maintained responsive **React.js** UI components by applying software engineering knowledge in design and implementation, contributing to a **12% increase** in user session retention.
 - Worked co-operatively with senior engineers to identify and eliminate redundant network requests via **client-side caching and memoization**, improving application performance with minimal supervision.

PROJECTS

- SnapMod – AI-Powered SaaS Platform**

Nov 2025 – Present

Next.js 14, TypeScript, Gemini API, Supabase (PostgreSQL), Dodo Payments, Clerk

Live App

- Responsible for the **development and application of software engineering practice** across the full lifecycle – research, design, implementation, deployment, and production maintenance – of a fault-tolerant, scalable AI SaaS platform.
 - Exercised **original thought and judgement** to engineer a secure, event-driven payment system using Dodo Payments web-hooks; implemented **idempotency checks** to guarantee exactly-once subscription activation and prevent distributed data inconsistency.
 - Solved a complex performance problem by applying systematic analysis, reducing compute-heavy AI inference latency by **40%** via edge caching and optimistic UI updates without increasing server-side load.
- ImageMagic – Distributed Image Transformation Platform**

October 2025

Next.js, TypeScript, Prisma ORM, PostgreSQL, Cloudinary CDN, Tailwind CSS

Live App | GitHub

- Designed and maintained a **RESTful API layer** with Prisma ORM over **PostgreSQL**, achieving multi-user data isolation via normalised schema design; deployed to production with structured **Git workflows** and comprehensive error handling.

SKILLS

- **Programming Languages:** Python, Java, TypeScript, JavaScript (ES6+), SQL
- **Core CS Fundamentals:** Data Structures & Algorithms , Operating Systems, DBMS, Computer Networks
- **Backend Development:** Fast API, Large Language Models(LLM) Node.js, Next.js, RESTful APIs, MongoDB, PostgreSQL, Prisma ORM
- **Frontend Development:** React.js, Next.js, HTML5, CSS3, Tailwind CSS, Responsive Web Design
- **Tools & Platforms:** Git, GitHub, VS Code, Postman, Vercel, n8n

EDUCATION

Degree	Institute	Percentage	Year
B.Tech.	Jaipur Engineering College and Research Center	87.20	2025
Senior Secondary	Alok School	84.00	2021
Secondary	Shree Jee Public Sr. Sec. School	89.17	2019

CERTIFICATIONS

- **Claude Code 101**, Anthropic

2026
- **React**, Next.js
